Summary

Enthusiastic and dedicated Full-Stack Web Developer with a strong foundation in building scalable web applications. Proficient in programming languages such as Java, Python, and JavaScript, with extensive experience in front-end and back-end development, including UI/UX design, API creation, and database management. Actively involved in collaborative tech projects, demonstrating strong problem-solving skills and a commitment to innovation.

Eager to apply technical expertise and innovative thinking to contribute effectively as a Software Engineer in a dynamic and challenging work environment.

Experience

Virtual CTO
UI/UX Design Intern
New Delhi - India (Remote)
May 2025 - July 2025

🔗 Certificate of completion

Education

University of Sciences and Technology Houari Boumediene (USTHB)
Computer Engineering
September 2022 - Present

Projects

TalkFlow - Realtime chat application

Tech Stack: ReactJS, Zustand, TailwindCSS & DaisyUI, Socket io

A real-time chat application that enables users to exchange instant messages and monitor online statuses through a seamless, responsive interface. It incorporates secure user authentication, ensures reliable conversation flow, and implements comprehensive error handling on both client and server sides.

🔗 Github repository

Hotel Management System (Java)
I developed a hotel management system that processes 200+ bookings per month, applying Java OOP principles, MVC architecture, and designing an intuitive GUI.

🔗 Github repository

Travel planning website

Tech Stack: HTML, CSS, Javascript, PHP, MySql

Developed a dynamic travel planning website that allows users to create personalized travel itineraries by inputting details . Designed an intuitive user interface to enhance user experience and implemented robust backend functionality to store and manage user-generated travel plans efficiently.

🔗 Github repository

Designing Neuron: A medical platform
A medical platform focused on enhancing healthcare accessibility and efficiency. It provides intuitive UI/UX designs for seamless appointment scheduling, and medical record management. The platform integrates user-friendly interfaces with secure data handling, ensuring a smooth and reliable experience for both patients and healthcare professionals.

🔗 Figma link

Recipe App (Flutter)
Developed a mobile recipe app using Flutter and SQLite, enabling users to browse and save over 50 recipes, implementing state management for smooth navigation.
