PROFESSIONAL SUMMARY

Cybersecurity Engineering student at USTHB with a strong foundation in offensive security, network security, and currently learning defensive security, complemented by several years of full-stack web development experience. Experienced in penetration testing, malware analysis, secure software development, and building AI-powered and scalable web applications using React, Next.js, Node.js, and MongoDB. Completed internships in offensive security R&D and full-stack software engineering, combining security expertise with practical software development to deliver real-world solutions. Passionate about solving complex security challenges and building secure, high-quality applications.

TECHNICAL SKILLS

- **Security Tools:** Nmap, Wireshark, Burp Suite, Metasploit, Volatility 3, PEStudio, Regshot
- **Cryptography:** AES, DES, 3DES, RSA, Diffie-Hellman, ElGamal, MD5, SHA-1/256/512, RSA-PSS, DSA
- **Networking:** TCP/IP, RIP, OSPF, BGP, MPLS, SDN, VPN, Firewall, ACL, QoS, Active Directory
- **Frontend:** React.js, Next.js, TypeScript, TailwindCSS, HTML5, CSS3, JavaScript, Zustand, Socket.io
- **Backend & Data:** Node.js, PHP, RESTful APIs, JWT Authentication, WebSockets, MongoDB, MySQL, PostgreSQL, Prisma OR
- **Languages:** Python, Java, C, TypeScript, JavaScript
- **DevOps, Platforms & Design:** Git, GitHub, Docker, Postman, Linux, Figma, Responsive & Accessible Design

PROFESSIONAL EXPERIENCE

- Offensive Security Engineer Intern (R&D)** | Keystone Group Algeria - Onsite *Mar 2026 – Apr 2026*
- Developed an automated phishing email generation system using LangChain and large language models (LLMs) for red team operations.
 - Conducted research into AI-driven social engineering techniques to assess and strengthen organizational security posture.
 - Applied offensive security methodologies in a research and development environment.
- Full-Stack Developer Intern** | SemanticMap UG — Germany (Remote) *Nov 2025 – Apr 2026*
- Collaborated on development and maintenance of a modern web application leveraging AI to streamline qualitative market research workflows.
 - Built and maintained features across the full stack using JavaScript frameworks and RESTful APIs in an agile, remote team environment, gaining exposure to secure software development practices.
 - Participated in code reviews and iterative delivery cycles, ensuring production-quality, maintainable code.
- UI/UX Design Intern** | Virtual CTO — New Delhi, India (Remote) *May 2025 – Jul 2025*
- Designed responsive UI/UX interfaces for web and mobile applications in Figma, adhering to modern design systems and accessibility standards.
 - Collaborated cross-functionally with product and engineering teams in an agile, feedback-driven environment.

SECURITY PROJECTS

- Penetration Test Lab with Metasploitable2** – <https://github.com/DjazzGh/Pentesting>
- Built a structured penetration test against Metasploitable2, exploiting WebDAV misconfigurations and known CVEs to achieve root access; documented the full kill chain with risk ratings and remediation.
- SSH Brute-Force Detection Lab (Wazuh SIEM)** – <https://github.com/DjazzGh/ssh-brute-force-detection-lab-wazuh>
- Designed and deployed a security monitoring lab using Wazuh SIEM to detect and remediate SSH
 - brute-force attacks in a Kali Linux/Ubuntu virtualized environment. Simulated real-world credential-
 - guessing attacks with Hydra and the rockyou wordlist, configured Wazuh's correlation rules to detect
 - brute-force patterns mapped to MITRE ATT&CK technique T1110 (Brute Force), and implemented an

- automated active-response integration that dynamically blocks attacking IPs via firewall rules—reducing
- manual incident response time.

Malware Analysis — Reverse Engineering & Digital Forensics

- Performed static analysis (PE header, entropy, packing detection, network/service imports) and dynamic analysis (registry monitoring, memory forensics with Volatility, network traffic with Wireshark) on two real-world malware samples.
- Identified persistence techniques, file encryption mechanisms (.WNCRY), SMB/EternalBlue propagation, potential data exfiltration, and plaintext encryption keys; tools used: PESTudio, FLOSS, Volatility 3, Regshot, Wireshark.

DEVELOPMENT PROJECTS

TalkFlow — Real-Time Chat Application — *React.js, Node.js, Socket.io, Zustand, TailwindCSS*

- Engineered a real-time chat application with instant messaging, live online-status indicators, and WebSocket-based communication using Socket.io.
- Implemented secure JWT authentication and a fully responsive, cross-device UI, with comprehensive client/server errorhandling for stable, resilient conversation flows. [Github Link](#)

SmartSpendAI — AI-Powered Expense Tracker — *Next.js, TypeScript, TailwindCSS, Prisma, PostgreSQL, OpenRouter API*

- Developed a personal finance management platform integrating AI models via OpenRouter API for automated expense categorisation at 90%+ accuracy.
- Built an interactive dashboard with dynamic charts for financial visualisation and spending pattern analysis, using Prisma ORM with PostgreSQL for type-safe data persistence. [Github Link](#)

EDUCATION

Computer Engineering — Cybersecurity Specialization

2022 - Present

USTHB (University of Sciences and Technology Houari Boumediene)

Final Year Student | Algiers, Algeria

CERTIFICATIONS

- [Introduction to Cybersecurity](#) — Cisco Networking Academy
- [Network Basics](#) — Cybrary
- [Operating Systems Basics](#) — Cisco Networking Academy
- [Offensive Security Operations](#) — Cybrary
- [Responsive Web Design](#) — freeCodeCamp
- [ReactJS from Beginner to Expert](#) — Udemy
- [Fundamentals of Machine Learning & AI](#) — AWS Training
- [Fundamentals of Cloud Computing](#) — Udemy
- [PMP Training Certificate](#) — Ben Hamouda Consulting
- [EF SET English Certificate \(C1\)](#)

COMPETITIONS, HACKATHONS & AFFILIATIONS

- [Advent of Cyber](#) — TryHackMe CTF Competition
- [Hackiwha 2.0](#) — Cybersecurity Hackathon, Micro Club USTHB
- [Experia Design Hackathon](#) — OpenMindsClub | [Ideathon](#) — MicroClub

Scientific clubs: Micro Club – USTHB | ShellMates – ESI Algiers | GDG Algiers – ESI Algiers
